

# About Us

Established in the year 2001, we, Aqua Fab Engineering & Services, are one of the professionally managed companies engaged in providing installation and service provider of Water Treatment Solutions. The services that we provide include Water Treatment Solutions. Our services encompass Effluent Treatment Plants Turnkey Projects, Civil Construction Turnkey Projects, Sewage Treatment Plants, Waterproofing Solutions, Rain Water Harvesting Projects and Fire Fighting Turnkey Projects. Apart from these we are also offering solutions for Swimming Pool Turnkey Projects, Waste-Water Treatment Plants and Water Treatment Plants to our high performance and accuracy. Our combined efforts in the last 8 years have enabled us to emerge as the market leader in this domain. The in-house cell for designing enables us to quickly and efficiently respond to clients' queries.

We are assisted by highly qualified professionals who are well aware of different professional fields. With strong commitment to excel in the concerned sphere and determination to redefine marketing, designing, installation, commissioning and after sales services, we are the most reliable company trusted by our clients.

Under the able guidance of our mentor Mr. Shrey Grover, who has vast industry experience and knowledge of over a decade, we have been successful in establishing a strong foothold for ourselves in this domain. Due to the ethical business policy and in-depth knowledge of our mentor, we have carved a niche for ourselves in the domestic market.
